MARC 21 Format for Bibliographic Data in Cataloging Module ALEPH500.

MARC 21 Format for Bibliographic Data is designed to be a carrier for bibliographic information about printed and manuscript textual materials, computer files, maps, music, continuing resources, visual materials, and mixed materials. Bibliographic data commonly includes titles, names, subjects, notes, publication data, and information about the physical description of an item. The bibliographic format contains data elements for the following types of material:

Books (BK) - used for printed, electronic, manuscript, and microform textual material that is monographic in nature.

Continuing resources (CR) - used for printed, electronic, manuscript, and microform textual material that is issued in parts with a recurring pattern of publication (e.g., periodicals, newspapers, yearbooks). Continuing resources (CR) were referred to as Serials (SE)).

Modulul Achiziții/Seriale

Trad.: Irina Gangan

Cuprins:

Prezentare generală 1

Explicații 2-18

Numerele de seriale în ALEPH sunt tratate ca înregistrări de exemplare. O înregistrare de exemplare include deținătorul (biblioteca filială), locația (colecția și cota), statutul exemplarului și barcodul.

În plus, caracteristicile de identificare ale unei înregistrări de exemplar de serial sunt:

- Descriere (de exemplu, vol. 17, nr. 3 (1993: Martie)); descrierea este afișată în lista exemplarelor și informează despre ceea ce este disponibil în bibliotecă.
- Link (legătură) către înregistrarea de abonament; link-ul este necesar pentru corespondența cu furnizorul.
- Enumerare și informații cronologice.

Training materials: Circulation

Tempus

Sarmite Krauze

Circulation

The ALEPH Circulation module enables you to register and monitor the various circulation activities of the library (loans, returns, holds, photocopy requests), according to each library's policies.

The system supports circulation, based on the status of an **item**, the status of a **patron** and **due date**. These three elements can be defined by the library to suit its circulation policies and can be changed as it is necessary.

When an item is loaned, the system checks the item and the patron. If there are any restrictions, the librarian is notified. When an item is returned, the system checks request and whether the item was returned late.

Summary of Questionnaire after LIS ALEPH500 Trainings

April 15 – 17, 2015.

In April 15 – 17. 2015 were the trainings of the Acquisition + Serials, Cataloguing + MARC21 and Circulation modules. Trainings were held in the Demo version environment. Workshops were organized in 3 blocks. The trainers were Daiva Jurkšaitienė (LUHS Library), Sandra Ansberga (RTU Scientific Library), Sarmite Krauze (RTU Scientific Library). There were training materials about all modules and presentations. In the materials are the explanations of modules and real instructions and steps

Ce este LibUnivCatalog?

LibUnivCatalog este Catalogul partajat al bibliotecilor universitare din RM, participante în cadrul proiectului Tempus „Servicii Informaționale Moderne pentru Studii de Calitate”.

LibUnivCatalog are capacitatea de a oferi acces la informații calitative, rapid și cu exactitate, dintr-o gamă largă de resurse informaționale. Este o platformă interactivă care oferă satisfacție utilizatorilor

Co-funded by the
