

Work Package 1: Creation of e-Library for
Moldova Universities

The main objective of WP.1

The main goal of this package is to create e-library and implement new virtual services for PC Moldovan academic community (students, researchers, lecturers). It is necessary to develop information infrastructure for Library consortium, to equip with hardware and software and organize information services for students and researchers in a constantly evolving IT environment.

Modern Information Services
for Improvement Study Quality
(MISIQ)

WP1. Creation of e-Library for
Moldova Universities

The goal will be achieved by solving essential objectives

- To review and analyze current situation of IT networking structure, equipment and perform modernization plan for Libraries;
- To develop infrastructure of information system for e-library in Moldovan Universities and install IT equipment, supporting LIS, and fast data interchange between consortium institutions;
- To purchase advanced integrated Library Information System (LIS) for PC Universities Libraries;
- To implement LIS to the shared/union server for PC Universities Libraries, adapt (LIS) system to the consortium Library needs, convert records if it is available, to create online Open Public Access Catalogue (OPAC) for Moldova partner libraries, to test LIS in each consortium Library;

Integrated Library System implementation

Modernize library services and create e-library academic community

Integrated Library Information System

Integrated Library Information System will be purchased and implemented for 7 Moldovan university libraries. LIS will support:

- OPAC,
- Cataloguing,
- Acquisition,
- Circulation,
- Administrative modules (including Oracle application)

Data conversion, systems configuration and system data analysis will be performed.

Moldova partner staff will load users' data, metadata, install barcode printing and scanning

WP1. Work Group

1. Daiva Jurkšaitienė, group leader, LT
2. Sarmīte Krauze, LV
3. Oksana Zaiceva, LV
4. Silvia Ciubrei, MD
5. Igor Afatin, MD

Meetings, Trainings and Study Tours

- Trainings for library staff to work with new LIS:

- administrate system,
- create and import metadata,
- circulation and user services

- Study tours of Moldovan Librarians to EU partner Libraries;

- E-Library development meetings
