

Ce este Accesul Deschis?

Accesul Deschis este o nouă mișcare ce se manifestă la nivel mondial, care luptă și sprijină circulația liberă, deschisă a informațiilor și ideilor.

www.openaccessweek.org

Co-funded by the
Tempus Programme
of the European Union

Mișcarea Accesul Deschis

- Model nou de acces la informație care oferă o alternativă pentru abonarea la revistele scumpe
- Aceasta este în prezent dezbatut de către: guverne, organisme de finanțare, universități, editori, biblioteci, ONG-uri etc.

Acțiunile politice pentru sprijinirea AD au contribuit la apariția unei serii de declarații

- *Inițiativa Accesului Deschis de la Budapesta* (februarie 2002)
- *Declarația de la Bethesda privind politica editorială* (iunie 2003)
- *Declarația de la Berlin privind Accesul Deschis la Cunoștințe în domeniul Științei și Științelor Umanitare* (octombrie 2003)

Literatura științifică în Accesul Deschis este:

- **electronică**
- **gratuită**
- **full-text**
- **disponibilă oricând și oriunde în lume**

Accesul Deschis oferă acces deschis la:

- monografii
- manuale
- reviste științifice
- articole științifice cu peer-review

Beneficiile AD?

- **Pentru autori:** AD oferă autorilor posibilități mult mai mari de diseminare a publicațiilor științifice în comunitatea științifică internațională.
- **Pentru cititori:** AD oferă acces fără bariere la publicațiile științifice pentru cercetările proprii, nefiind constrânsi de bugetele bibliotecilor.
- **Pentru profesori și studenți:** AD oferă condiții egale privind accesul la resursele informaționale, excludând necesitatea obținerii permisiunii pentru reproducerea sau distribuirea conținutului publicației.
- **Pentru biblioteci:** AD soluționează problema crizei prețurilor pentru revistele științifice, contribuind la completarea golorilor în colecția bibliotecilor.
- **Pentru universități:** AD mărește vizibilitatea instituțiilor, reducând cheltuielile lor pentru procurarea revistelor științifice, avansînd misiunea lor în diseminarea cunoștințelor.
- **Pentru agenții finanțatoare:** AD mărește returnarea investițiilor în cercetare, făcând disponibile publicului larg rezultatele cercetărilor finanțate din bani publici.

Accesul Deschis asigură accesul liber la literatura științifică de ultimă oră și la rezultatele cercetării.

Cercetarea ta este și alegerea ta!

- Accesul Deschis îți dă posibilitate ca munca ta intelectuală să fie apreciată la nivel global. Tu, ca autor alegi cum să-ți publici articolele.

Bioline International is a not-for-profit scholarly publishing cooperative committed to providing open access to quality research journals published in developing countries. BI's goal of reducing the South to North knowledge gap is crucial to a global understanding of health (tropical medicine, infectious diseases, epidemiology, emerging new diseases), biodiversity, the environment, conservation and international development. By providing a platform for the distribution of peer-reviewed journals (currently from Bangladesh, Brazil, Chile, China, Colombia, Egypt, Ghana, India, Iran, Kenya, Malaysia, Nigeria, Tanzania, Turkey, Uganda and Venezuela), BI helps to reduce the global knowledge divide by making bioscience information generated in these countries available to the international research community world-wide.

Expression of interleukin-22 during viral myocarditis

Th22 cells are a newly discovered class of regulatory T cell that secretes the cytokine IL-22. Qing et al show that Th22 cells are upregulated during viral myocarditis in mice and that blocking IL-22 exacerbated disease. This suggests that Th22 cells / IL-22 may be protective against viral myocarditis and could be developed as a novel therapeutic.

Best Care at Lower Cost: The Path to Continuously Learning Health Care in America

America's health care system has become too complex and costly to continue business as usual. *Best Care at Lower Cost* explains that inefficiencies, an overwhelming amount of data, and other economic and quality barriers hinder progress in improving health and threaten the nation's economic stability and global competitiveness. HOME ABOUT PUBLICATIONS PUBLISH SUPPORT US

Welcome to PLOS

We are a nonprofit publisher and advocacy organization. Our mission is to accelerate progress in science and medicine by leading a transformation in research communication. Every article that we publish is open-access - freely available online for anyone to use. Sharing research encourages progress, from protecting the biodiversity of our planet to finding more effective treatments for diseases such as cancer.

["HowOpenIsIt?" Now Closed for Public Comment](#)

OCTOBER 8, 2012

On behalf of PLOS, SPARC and OASPA I want to thank everyone who provided comments on the open access resource guide, "HowOpenIsIt?" We received more than fifty comments and are reviewing all the feedback. To date, your feedback is prompting changes to 17 of the original 27 openness components. We plan to release a final version during Open Access Week (October 22-28, 2012). We will also share a high level summary of the comments.

The goal of the guide is to move beyond the deceptively simple question of, "is it open access?" toward a more productive evaluation of "HowOpenIsIt?" In its
